Highlights

Practice shows the way

Tatiana Balbi Fraga

- This paper presents a strategy for teaching undergraduate students based on practical experience
- This strategy is strongly associated with the inseparability between teaching, research, extension and technological development
- This paper also recommends some important resources that can be used to develop group work
- And it discusses a solution to the impasse between transparency and guaranteeing the authenticity of the work, already widely used for software development but not in the development of research works

Practice shows the way
